The purpose of this amendment is to update the SSC subcontracting goals and to incorporate vendor questions and answers and subsequent changes into the subject solicitation:

A. Attachment 1, page 2 of 14, Addendum to 52.212-1, Instructions Regarding Submission of Offer, paragraph (E)(2). The FY09 subcontracting goals for Stennis Space Center are replaced in their entirety with the following:

Small Business	18.00%
Small Disadvantaged Business	5.00%
Historically Underutilized Business Zone Concerns	2.00%
Women Owned Small Business	3.00%
Service Disabled Veteran Owned Small Business	2.00%

B. The following questions and answers are hereby incorporated:

QUESTIONS & ANSWERS FOR REQUEST FOR PROPOSAL (RFP)/SOLICITATION NO.
NNS09293400R, THIRTY-INCH INDUSTRIAL WATER BALL VALVES AT NASA STENNIS
SPACE CENTER MS

Date: June 2, 2009

Q1 - What are the minimum and maximum number of valves to be purchased?

A1 - See solicitation page 7 of 10, Addendum to 52.216-18 Ordering and 52.216-19 Order Limitations, Delivery Order Issuance Procedures, paragraphs (A)(2) and (3). A minimum of two (2) and a maximum of eighteen (18) valves may be ordered during the five-year performance period.

Q2 - Will the order of magnitude (in dollars) for this project be released?

A2 - No; project magnitude is typically only provided for construction projects.

Q3 - Is this procurement to install the valves?

A3 - No. This is to supply/deliver the valves only.

Q4 - Please advise if "Pneumatic operator with pressure range of 800 to 1000 psig" is correct. If so, can you advise your preferred vendor. Our preferred vendors can only supply this as a hydraulic application.

A4 - Yes, "Pneumatic operator with pressure range of 800 to 1000 psig" is correct. The pneumatic operators at SSC are using 1000 psig gas supply. SSC has no preferred vendor.

Q5 - We have run into a Flange to Flange dimension issue. The above said solicitation is requesting "Resilient Metal Seats" with a Flange to Flange Dimension of 46 inches. The Metal Seat valves produced by ... are approximately 47.5 inches Flange to Flange. However, the valves that are currently installed have Rubber seats. The Rubber seated valves are still available, have a Flange to Flange Dimension of 46 inches Do the valves need to be Metal Seats or will the original configuration of rubber seated valves be authorized? If the valves are required to be Metal Seats ..., modifications of the existing system would be required.

A5 - a) See solicitation page 3 of 10. The Statement of Work requires a "Flange to flange dimension of 46 inches minimum, 48 inches maximum." This should answer the size question. b) We feel the confusion regarding seating may be the requirement for "resilient metal seats," where it is assumed that

both sides of the mating surfaces are required to be metal. Actually, rubber-to-metal seats is desired to be compatible with existing valves.

C. Offerors are requested to notify the procuring office prior to the offer due date specified in Block 8 of the SF1449 if the valve(s) required cannot be provided as specified.

D. Attachment 1, page 3 of 14, Addendum to 52.212-1, Instructions Regarding Submission of Offer, paragraph (J) is added as follows:

(J) ALTERNATE PROPOSALS - Offerors are allowed submit an alternate proposal that departs from the stated requirements. Such proposals shall clearly identify why the acceptance of the proposal would be advantageous to the government. Any deviations from the Statement of Work and/or terms and conditions of the solicitation, with the comparative advantage to the government, shall be clearly identified and explicitly defined. The offeror shall also provide an assessment of the risks associated with the offeror's approach, including the identification of impacts and mitigation recommendations in the applicable section of the proposal. The government reserves the right to amend the solicitation to allow all offerors an opportunity to submit revised proposals based on the revised requirements. If an alternate proposal is submitted, offerors are required to submit a separate, independent, and complete proposal that conforms to the solicitation to ensure consideration.

E. The date/time for receipt of proposals specified in Block 8 of the SF1449 is NOT extended.

F. As stated in block 14 of the SF30, all other terms and conditions are unchanged.
